Longarm Quilting Services/Pricing

Services

All of our longarm quilting services are completed on "Sewfie", our Gammill Optimum longarm machine with Statler Stitcher. Paula Ivers & Jody Gosnell will be your trained operators! The Statler Stitcher utilizes computer hardware and software to guide "Sewfie" in creating state of the art stitch and design precision. We are currently offering Edge-to-Edge (E2E...also known as Pantograph) services only. E2E is a single pattern used on the entire quilt top. We have a wide selection of quilting patterns and designs to choose from.

We ask that you call the shop for a **Quilt Check In** appointment before you bring your quilt in. Appointments will last approximately 10-15 minutes. During this time Paula or Jody will work with you to choose the designs and quilting thread that will help create your treasured quilt. Quilts may not be dropped off without an appointment. This is for your own safety and that of your quilt! We would hate for one of your beautiful creations to go missing!

Pricing

Quilting costs are determined by the size of your quilt top in square inches. Measure the width and the length and multiply those two numbers for the square inches. As an example, if your quilt top measures 60" x 70" then your quilt is 4,200 square inches. At our rate of \$.025 per square inch your total cost would be \$105. This cost includes thread but does not include the cost of batting. Our minimum longarm fee is \$50.

Batting

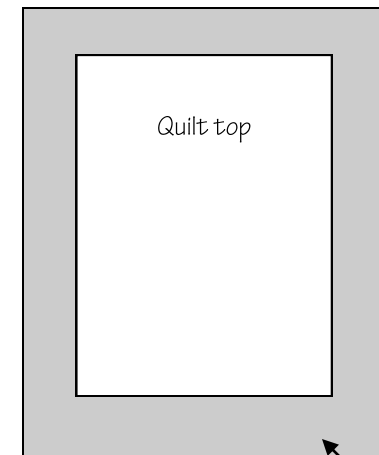

We offer Warm & Natural and Quilters Select (100% cotton), Hobbs 80/20 (80% cotton, 20% polyester), and 100% wool batting at a discounted price to those using our longarm services.

Quilt Prep

Our goal is to provide professional quilting services with a quick turn-around time at a reasonable price. In order to do that please make sure that your quilt is flat, all seams are secure and that all threads have been trimmed. Rather than incur extra expenses, we will return your quilt to you to make any necessary adjustments. Please refer to the following checklist before calling for a quilt check-in appointment.

- Check to make sure seams are secure. If you have a quilt top with bias edges or "piano keys" on the border you should stay stitch the outer border.
- Have seams pressed well and be sure all excess threads are clipped on both the front and back of your top (unclipped threads may show through once your top is quilted! We will not take the time to clip stray threads.)
- Indicate the top and bottom of the quilt top and backing if it's directional.
- Quilt top **MUST be squared** and lay flat. Measure your quilt across the top, bottom, and at the center. If the outer edges are more than an inch or two bigger than the center, you will have wavy borders which can result in puckering of your finished quilt. If we find there to be excess fabric in your borders, we will contact you to adjust them.
- Remove all pins, embellishments, etc.
- Quilt top & backing must be brought in as separate layers.

- Stitch your backing fabric with a 1/2" seam allowance. Remove all selvages and press seams open.
- Batting & backing must be 6"-8" larger than the quilt top and **squared**. Use a 90° ruler to verify.
- We do not accept bed sheets as backings.
- If your thread color choice is lighter than the backing fabric, it may result in the lighter color thread "poking" through on the back. Also, if your thread color on the back is darker than your quilt top, this may result in "pokies" on the top. It's best to use the same thread color on the top and in the bobbin. Keep this in mind when choosing your backing fabric.

Backing & batting 6-8"
larger than quilt top
